

Lexington Math Tournament 2016

Sponsor Information

COMPETITION

Lexington Math Tournament is New England's largest high-school-run middle school math competition, this year bringing together the region's most mathematically talented middle school students for the seventh annual LMT. By sponsoring, you'll be both enabling an amazing middle school outreach opportunity and supporting one of New England's most awarded high school math teams.

INSPIRATION

Inspired by tournaments like the Harvard-MIT Mathematics Tournament and the Princeton University Mathematics Competition that provide challenging problems to high school students, we aim to offer middle school students an equally fun competition to help bridge the gap to high school mathematics and encourage them to continue their pursuit of mathematics in all of its forms.

RECOGNITION

Some of the biggest players in engineering, technology, and finance now sponsor math competitions at all levels. Sponsoring LMT will show off your brand to some of the best and brightest middle school students in New England, and make the lasting impression that you are committed to advancing the next generation of intellectual pioneers.

Find out more at <http://lhsmath.org/LMT>, or by contacting us at sponsors@lhsmath.org.
